# Sunsetting Patient Accounting Systems

Amy Scott, MHA, CPC  
November 9, 2017

## Learning Objectives

**At the end of the presentation you should be able to identify:**

- ✓ Necessity of sunseting legacy system
- ✓ Risks of inaction
- ✓ Considerations and challenges
- ✓ 4 steps to a successful wind down

## Polling Question #1:

Have you  
started  
sunsetting a  
legacy  
patient  
accounting  
system?

- A. No, have no intention of switching systems in the near future.
- B. No, but intend to do so in the near future.
- C. Yes, already started but not done cleaning up credit and debit legacy accounts.
- D. Yes, all done. Legacy credit and debit accounts are entirely cleaned up.

# Trends, Risks and Challenges

## Trends

- EHR replacement is on the rise  
59% increase between 2010 – 2015 <sup>4</sup>
- From paper records to EHR is declining  
26% decrease between 2010 – 2015 <sup>4</sup>

So what does this mean?

Legacy data concerns are increasing <sup>4</sup>

## Trends

### **Why is EHR adoption on the rise? <sup>6</sup>**

- 16% rise per year between 2008 – 2014
- 75% in 2014 alone
- Incentives and then penalties

### **What do you do with the old system?**

# Risks

## A legacy system makes it difficult to...

## Top concerns for hospital CEOs <sup>1</sup>

# Challenges

Scope

Operating Out of Two Systems

Accessing Legacy Data

# Challenges

## Scope

- Major undertaking: outsource parts of process
- Simultaneously maintain AR and patient care in two systems
- Impact on staff, productivity and revenue

# Challenges

## Operating Out of Two Systems

- Cash collections decreasing
- DAR increasing
- Concerns with patient safety
- Strain on staff resources

# Challenges

## Accessing Legacy Data

### Traditional Approaches

- Full Data Conversion
- Summary Reports
- Balance Forward Methodology
- Maintaining Legacy Access to Patient Records

# Challenges

## Accessing Legacy Data

### New Approach <sup>3</sup>

#### Active Archiving Technology

- No data loss
- Add, edit, view, or run reports in the same fashion as the legacy system
- Patient, clinical, and financial data can all be extracted and archived for easy access
- Staff can view and manage data directly
- Legacy systems are decommissioned reducing costs and IT support requirements
- Acts as a single repository for all legacy systems allowing IT to easily manage all legacy data
- Assures state and federal data retention compliance

## Polling Question #2:

What is the biggest obstacle your organization is facing in winding down your legacy system?

- A. Concerns with accessing legacy data after retiring system
- B. Lack of available staffing resources to complete the project
- C. We don't foresee any obstacles in retiring our legacy system
- D. We do not have a legacy system

4

# STEPS

TO  
SUCCESSFULLY  
SUNSETTING  
PATIENT ACCOUNTING  
SYSTEM

1. Planning

2. Process  
Improvement

3. Clean-Up

4. Retire  
System

1

PLANNING  
**PLAN**  
AND MORE  
**PLANNING**

# Planning

- Engage Stakeholders
- Accountability
- Team members from all affected areas

- Data-input end date
- Legacy AR processes
- Legacy system retire date

- Conversion issues
- State of legacy AR and time/resources to work
- Time away from current billing

2

IMPROVE  
PROCESSES  
AND MAKE  
ADJUSTMENTS

## Process Improvements

# OPPORTUNITY

Use legacy data as basis for new EHR:

- Are current processes clearly documented?
- Will these processes be transferable?
- Are there operational gaps in the current state?
- How will new EHR impact resource allocation?

Areas of focus:

Charge Description Master (CDM)    Service Locations  
Insurance Plan Dictionary            G/L Mapping

## Polling Question #3:

True or False?  
You can  
increase net  
revenue by  
resolving  
credits.

True

3

CLEAN-UP  
ACCOUNTS  
DEBITS AND  
CREDITS

# Debits

## Goals

- Keep in mind the goal: Work down accounts so that only self-pay, self-pay after insurance and credit balances remain.

## Pick A Date

- Pick a date to stop entering new charges in legacy system

## Select a Vendor

- Alleviate burden on staff
- Resolve outstanding debits more quickly so can close legacy system faster

## Switch EDI/EFT/ERA

- Electronic claims submission, payments and remittance must be switched to new system. This can take 30+ days

# Debits

## Traditional Approaches

- Full Data Conversion
- Balance Forward Methodology
- Running A/R Data Out of the Legacy System

# Debits

## New Approach <sup>7</sup>

### Active Archiving Technology

- No data loss
- Add, edit, view, or run reports in the same fashion as the legacy system
- Patient, clinical, and financial data can all be extracted and archived for easy access
- Helps maintain cash flow
- Can bill and post existing receivables directly out of the archives
- Staff can view and manage data directly
- Legacy system decommissioned reducing costs and IT support requirements
- Acts as a single repository for all legacy systems allowing IT to easily manage all legacy data

# Debits

## Goals

- Keep in mind the goal: Work down accounts so that only self-pay, self-pay after insurance and credit balances remain.

## Pick A Date

- Pick a date to stop entering new charges in legacy system

## Select a Vendor

- Alleviate burden on staff
- Resolve outstanding debits more quickly so can close legacy system faster

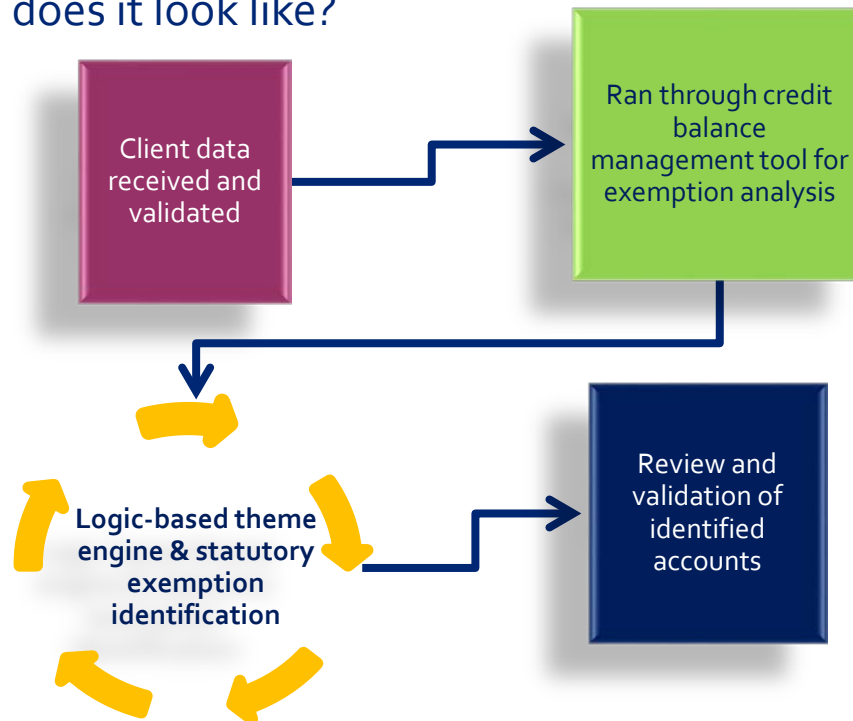

## Switch EDI/EFT/ERA

- Electronic claims submission, payments and remittance must be switched to new system. This can take 30+ days

# Credits

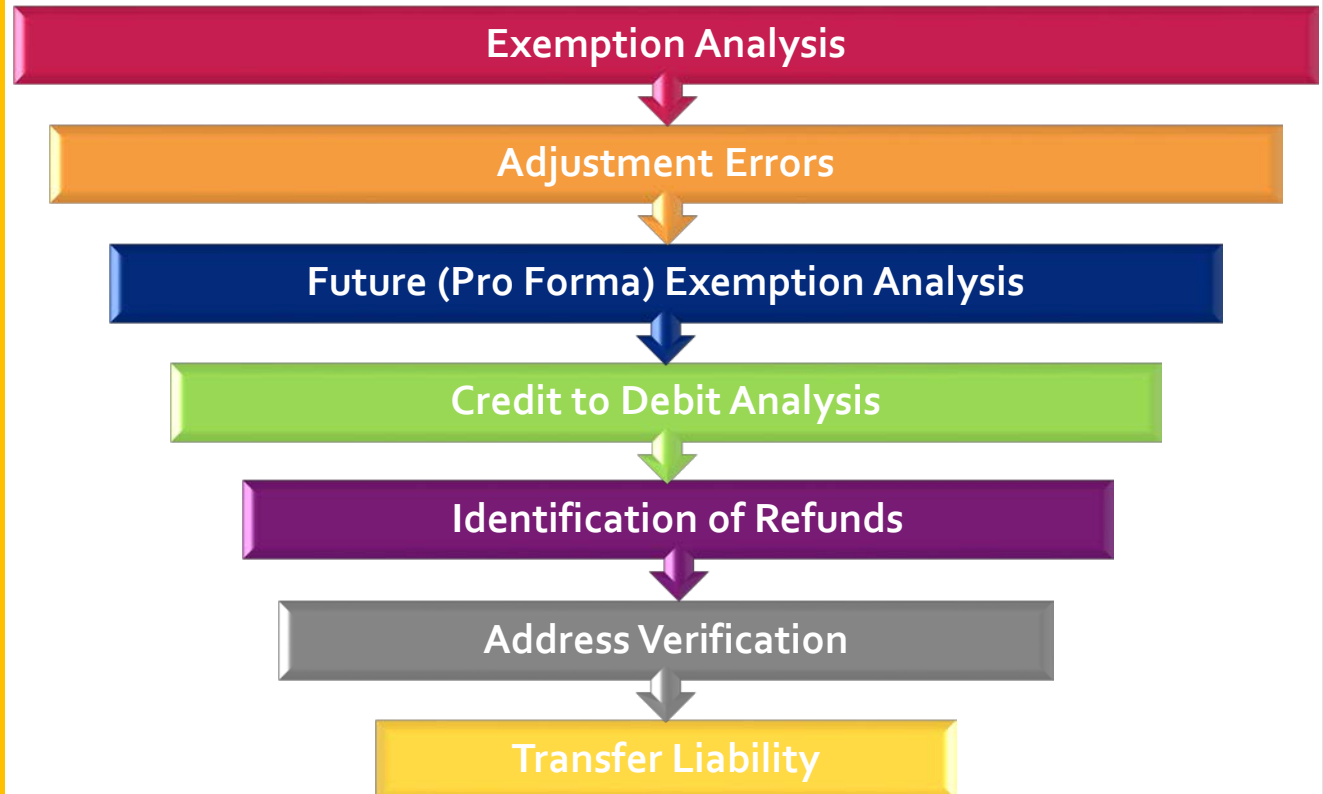

## Using technology to resolve credits faster

- National average shows it takes 15 minutes to manually work one credit balance account.
- Use of logic-based theme engine to identify statutory exemptions, adjustment errors, credit-debit patient transfers
- What does it look like?

# 7 Steps: Credit Balance Wind Down

Credits

# Credits

- **Exemption Analysis**
  - Credit Balance Statutes – 36 states have exemption around A/R credit balances
  - Business to Business – 12 states have unclaimed property exclusions
  - Federal Statute – Social Security Act constricts timing of Medicare/Medicaid recoups
- **Adjustment Errors**
  - Dollars not actually due back, credit balance caused by over contractualizations or other erroneous adjustment
- **Pro Forma Exemption Analysis**
  - Identifying date that remaining non-exempt refunds would become eligible for exemption – newer balances should have top priority

# Credits

- **Credit to Debit Analysis**
  - Find any open debit balance account (legacy and current system) for accounts where a patient refund is identified.
  - Transfer dollars to debit account to lower credit and debit liability.
- **Identification of Patient Refunds**
  - Use transactional account history and analytics to identify overpayments due back to patients (POS collections, duplicate payments, primary rebill, etc.)
- **Address Verification**
  - Run all remaining patient refunds through address verification before sending a refund check out
  - Accounts where address comes back invalid can be immediately transferred to unclaimed property liability account
- **Transfer of Liability (Unclaimed Property Reporting)**
  - Refers to the transferring of abandoned property to the state custodian for owners that cannot be located after a certain period of time (typically 3 or 5 years for A/R credit balances)

4

**RETIRE**  
**SWITCH OFF**  
**LEGACY**  
**SYSTEM**

# Retire Legacy

## Checklist:

- ✓ Legacy data solution selected
- ✓ Debit accounts resolved and all payments and adjustments posted
- ✓ Credit accounts resolved and all refunds issued and transfer of liability complete
- ✓ Migrated legacy data
- ✓ Shut it down

## Polling Question #4:

What is often the biggest legacy data liability concern during an unclaimed property audit?

- A. Debits
- B. Credits
- C. Adjustment Errors
- D. All of the Above

## Take Aways

- Avoid working in both systems longer than absolutely necessary
- Realize this is a complex endeavor and you'll want to identify in-house resources and leverage outside expertise to resolve your debit and credit balances.
- Identify true liability. Send out refunds only after you are sure they are truly owed (they could be adjustment errors, meet statutory exemptions, unclaimed property.)
- Choose a method for archiving data that allows you to shut off your legacy system
